Arrow Electronics Extends Data and Artificial Intelligence Portfolio with ProphetStor

London, UK – 1st November, 2018 – Global technology provider Arrow Electronics and intelligent data platform provider ProphetStor Data Services, Inc., have entered a distribution agreement by which Arrow will make ProphetStor’s data intelligent solutions available to channel customers in UK and EMEA.

ProphetStor, headquartered in Milpitas, Calif., provides enterprises and cloud service providers with artificial intelligence-enabled data services. Major IT vendors distributed by Arrow work with ProphetStor on data security protection. The agreement with ProphetStor demonstrates Arrow’s commitment to provide the channel with sophisticated solutions.

With Federator.ai®, ProphetStor developed the AIOps platform approach connecting DevOps processes with artificial intelligence. The platform enables DevOp teams to leverage technology for data aggregation, machine learning, visualisation and automation. ProphetStor’s flagship product is DiskProphet®, a patented and intelligent data analytics solution that addresses the problem of data loss prevention. The solution continuously collects data from hard and solid-state disks to predict behaviour and to provide prescriptive actions.

“ProphetStor is another great example for emerging players that Arrow adds to its portfolio when it comes to the key technology trends of tomorrow,” says Mark McHale, vice president UK & Ireland of Arrow’s enterprise computing solutions business. “Both

large vendors and new disruptive players are increasingly focusing on the rising artificial intelligence and machine-learning technology. At Arrow, we enable the channel to enter the extremely important market of DevOps data science.”

“We are delighted to work with Arrow in the data-growth market, and continue expanding our global presence in EMEA by bringing intelligence into the data centre and cloud infrastructure,” said Anne-Marie Abad, vice president, Southern EMEA Sales at ProphetStor. “With ProphetStor’s AI-driven data services, and a strong partner ecosystem from Arrow, businesses can now build optimised and resilient infrastructures that are fully orchestrated to support AIOps initiatives.”

Supported by Arrow on-site, ProphetStor will show its intelligent data solutions at VMworld (Nov 5-8, Barcelona) at stand N14.

About Arrow Electronics

Arrow Electronics guides innovation forward for over 150,000 of the world’s leading manufacturers of technology used in homes, business and daily life. With 2017 sales of \$26.6 billion, Arrow aggregates electronics and enterprise computing solutions for customers and suppliers in industrial and commercial markets. The company maintains a network of more than 345 locations serving over 80 countries. Learn more at [FiveYearsOut.com](https://www.fiveyearsout.com)
