

Arrow Electronics strengthens EMEA IoT portfolio with CymbloT

Paris, 10 December 2018 – Global technology provider Arrow Electronics has added CymbloT to its “sensor-to-sunset” IoT offering. CymbloT focusses on integrating and managing large-scale IoT and video management networks and deployments.

CymbloT’s product portfolio includes two key products that help companies efficiently operate their IoT solutions. The company’s C&C sensor-agnostic software connects all types of systems, subsystems, video feeds, and sensors into a single platform with real-time response, security, user-interface tools and automated process capabilities.

CymbloT’s VMS is a large-scale video management system, managing thousands of cameras in a single deployment and allowing hundreds of operators to work simultaneously. It is designed for mass deployment and can be used in any industry environment and smart cities. Additionally, it allows video content analysis.

“The IoT market is increasingly getting complex with a wide range of solutions and suppliers, and we focus on high-potential innovations such as those from CymbloT”, says Paul Karrer, EMEA IoT director for Arrow’s enterprise computing solutions business. “Another great example from Israel’s strong tech scene, CymbloT is coming up with technology that will be essential to manage the IoT of tomorrow.”

“Working with Arrow is a first choice, giving their compelling and globally unparalleled IoT approach”, says Oren Feldmann, CEO of CymbloT. “Arrow’s capability to provide all technologies to implement IoT systems, ranging from electronic components up to IT solutions, provides us with the perfect environment to offer up our solutions that can easily be added-on top.”

“From sensor to sunset” represents Arrow’s comprehensive portfolio of technology from sensors, wireless connectivity, gateways to cloud platforms, data ingestion, aggregation and visualisation, analytics, and security. Service capabilities span ideation, design, integration, manufacturing, logistics, financing, wireless connectivity with billing services, marketing, monitoring and managed services, and sustainable and secure end of life cycle disposition.

About Arrow Electronics

Arrow Electronics guides innovation forward for over 150,000 of the world’s leading manufacturers of technology used in homes, business and daily life. With 2017 sales of \$26.6 billion, Arrow aggregates electronics and enterprise computing solutions for customers and suppliers in industrial and commercial markets. The company maintains a network of more than 345 locations serving over 80 countries. Learn more at FiveYearsOut.com.
